**DETAILED ACTION**

***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cimarelli et al (Tetrahedron: Asymmetry (2002), 13(22), 2417-2426).

The instant claims are drawn to compounds which are useful for making chiral alcohols. The claims explicitly exclude certain compounds in the (i) and (ii) proviso. The prior art of Cimarelli et al is drawn to compounds which have the same utility as the instant claimed compounds. The compounds disclosed in Cimarelli et al are expressly excluded by the provisos of claim 1. However, obvious variants of the compounds disclosed by Cimarelli are not excluded by the instant claims.

Thus the examiner contends that one having ordinary skill in the art at the time that applicant's invention was made would have had a reasonable expectation of success in using structurally obvious compounds to those disclosed in Cimarelli et al in a process of making chiral alcohols.

For example Cimarelli et al disclosed the following compound:

Art Unit: 1621

Even though this compound is excluded by proviso (ii), the positional isomers of this compound are not excluded. Thus it would have been well within the skill of an ordinary artisan to have used positional isomers of this compound and to expect that said positional isomers would have been useful in making chiral alcohols. The same analogous argument applies to the other compounds explicitly disclosed by Cimarelli et al.

Thus the adjacent homologues of the following compound are obvious.

The method claims are deemed to be obvious because the same reaction chemistry is disclosed in Cimarelli et al. Any specific claimed limitation not explicitly disclosed is seen as an obvious work up step for an enantioselective reaction.
